

Discover our New FLX Finish Technology

This game-changing technology achieves a spectacular finish through the combination of special UVgel Inks and FLX Finish Technology, a state-of-the-art UV LED Curing.

FLX Finish High-Gloss

FLX Finish Ultra-Matte

FLX Finish SPOT Gloss & Matte

Flexible Finish Options Expand Your Creativity

With FLX Finish technology you have the choice of Matte or Gloss Finish, including Spot Gloss and Matte on the same print, without varnish or additional consumables!

Exceptional Durability

Durability is critical for many wall décor applications, especially in demanding environments.

Output is washable and scrubbable, abrasion resistant, and able to withstand strong light without fading. Not even alcohol, acetone or glass cleaner can remove UVgel ink!

Safety and Sustainability

Regulatory requirements for wallcoverings cover everything from smell to VOC emissions, heavy metals and washability. UVgel delivers a large color gamut and combines it with all the environmental benefits. These odorless prints are certified for immediate indoor use, even in sensitive environments such as schools and healthcare facilities, under the UL GREENGUARD Gold Certification Program.

- Scratch resistant with no overlaminated.
- UL GREENGUARD Gold Certification Program.
- Matte, Gloss Finish or Spot Gloss and Matte on the same print!

Your customers want “Wow”

Modern customers want originality and a “wow factor” that’s unique to their spaces. And they don’t expect their creative vision to be limited by technology.

With the UVgel Inks and FLX Finish Technology, we can offer almost infinite creative possibilities for wallpapers, murals and other large-scale décor elements.
